

CHOICES

IT'S THE DETAIL THAT MAKES THE DIFFERENCE!

www.timberwindows.com

ACHIEVE THE *perfect* windows & DOORS FOR YOUR HOME

he Timber Windows range provides a wide range of choices to help you achieve the perfect windows and doors for your home.

For many customers, colour is critical - with natural timber finishes, subtle shades of cream, green, blue and grey, as well as elegant black, the Timber Windows colour palette can help to highlight or to blend in. Multiple colours are also possible, with the option to finish the insides of your windows and doors differently from the outsides. We can also offer colours complementary to leading quality paint brands, to coordinate with your interior colour scheme.

Our collection of Entrance Doors comprises twenty-seven styles derived from designs and configurations found in homes of character across the country. Most are available as a Town House door without an external handle, and as stable doors.

A selection of decorative glass options, based on authentic Victorian stained glass motifs, has been especially commissioned for the range. These may be selected from a variety of colour palettes to complement the door finish.

With a wide range of ironmongery styles and finishes, including our exclusive Samuel Heath range, you can choose the finishing touches that make all the difference.

For entrance doors this also includes spy holes, letter-plates, handles and knockers.

INDUSTRY LEADING PRODUCT Guarantees

FUNGAL & INSECT

For a period of 30 years from the date of delivery, Timber Windows warrants that the goods will be free of rot or fungal infection under normal conditions, and that every reasonable effort has been made to ensure the use of good quality materials, and where care and maintenance has been carried out satisfactorily.

SEALED UNIT

For a period of 10 years from the date of delivery, Timber Windows warrants that double glazed sealed cavity units, supplied factory fitted shall be fit for purpose for which goods of the type are normally used under normal conditions, and that every effort has been made to ensure the use of good quality materials, and where care and maintenance has been carried out satisfactorily.

HARDWARE

For a period of 10 years from the date of delivery, Timber Windows warrants that all hardware that is supplied factory fitted shall be fit for purpose for which goods of the type are normally used under normal conditions, and that every reasonable effort has been made to ensure the use of good quality materials, and where care and maintenance has been carried out satisfactorily. Certain types of ironmongery carry differing levels of guarantee depending on their finish and the manufacturer.

WORKMANSHIP

For a period of 10 years from the date of delivery, Timber Windows warrants that goods supplied will be free from defects as a result of manufacturing processes when used under normal conditions, and where care and maintenance has been carried out satisfactorily.

GUARANTEE GUARANTEE

PAINT & STAIN

For the decorative finish on products supplied factory finished, Timber Windows warranty shall be 8 years for paint finished items and 5 years for stain finished items from the date ofdelivery, in normal use and moderate weather conditions, and where care and maintenance has been carried out satisfactorily.

GLAZING PERFORMANCE

Our energy saving double glazing features high-performance glass with gas filled sealed units, and warm edge spacer bars, for ultimate comfort whether it is warm or cold outside, and exceptional noise reduction.

An 18mm double glazed unit with a krypton gas filled cavity, in an Annealed 4/10/4 Low E formation has a typical centre pane U-value of 1.0W/m2k.

A 24mm double glazed unit with an argon gas filled cavity, in an Annealed 4/16/4 Low E formation has a typical centre pane U-value of 1.1W/m2k.

GLAZING performance

PAINT COLOURS & finishes

COLOUR OPTIONS

hite painted windows look traditional and smart but are not the only option available to homeowners when considering new fenestration - indeed, householders may be surprised to learn that only 40% of the windows we sell are white. Our products are available in hundreds of different shades from vibrant hues to subtle creams and greys. Multiple colours can also be combined on one item, enabling you to finish the internal frame to match your room decor. We strongly recommend inspecting samples first hand as a brochure can only provide an indicative guide. Colour swatches and samples are available from your local showroom - take a swatch away with you and offer it up to your property to ensure a good match.

STANDARD COLOURWAYS

6

Choosing the right windows for your home is easy with our most popular colour options (right).

RAL COLOUR OPTIONS

In addition to our standard palette, our products are available in any colour from the RAL Classic range providing a further 210 shades for you to choose from.

COMPLEMENTARY COLOURS

We offer a wide range of colours that complement those from Farrow & Ball and Fired Earth, allowing careful co-ordination of the fenestration to the wider interior scheme. Remember too that dual colour is also possible – with frames finished in different shades internally to externally.

ACHIEVING A PERFECT PAINT FINISH

Microporous coatings are an innovative solution used across our products, providing a flawless finish along with ultimate protection. Microporous coatings allow wood to breathe; essential for keeping windows and doors in top condition, as they permit the passing through of moisture vapour, thus an equilibrium of moisture content is maintained through the seasons, preventing decay and ultimately prolonging the life of the timber and the product.

All our products receive the same, thorough, advanced four-layer treatment beginning with a wood preservative, followed by a primer and finally two top coats to achieve that perfect finish.

STAIN OPTIONS

Due to the natural and attractive variance of the timber in colour and texture, stain finishes can vary from one piece of timber to another. Stain finishes shown are indicative of the shades

available, but we are unable to guarantee a complete colour match either in installations carried out at the same time or in staged time installations.

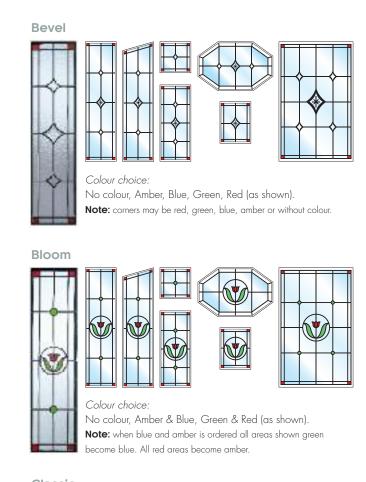

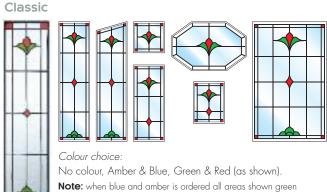

Porcelain	French Grey	Field Mouse	Oxford Clay
Blue Grey	Talisman	Harewood Grey	Oxford Blue
Tent Grey	Verdi	Mustang Green	Fortnum
Hampstead Red	Keswick Lead	Warwick Stone	Whitby Jet
Urbane Grey	London Grey	Anthracite	Black
Cream	Smoke Cream	Calm Grey	

DECORATIVE GLAZING options

A selection of glazing options based on authentic Victorian stained glass motifs has been uniquely commissioned for our range. These may be selected in a variety of colour finishes to complement your timber front door, or add character to the fanlights of your timber windows. Our standard range is manufactured as double glazed units with UV resistant coloured polyester films applied to the outer pane.

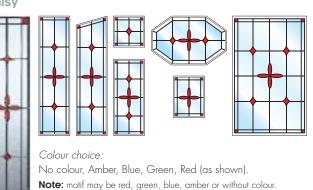

Note: Certain glazing designs may not be practical on some door styles depending on the actual size of the door blade, particularly on small narrow doors. Colours and designs shown in this brochure are intended as a guide only, for samples contact your showroom.

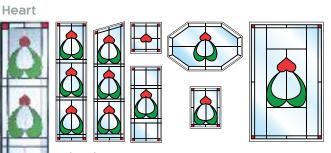

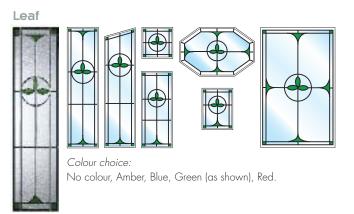

pecome blue. All red areas become amber.

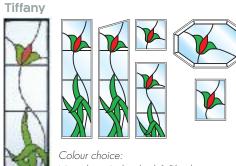

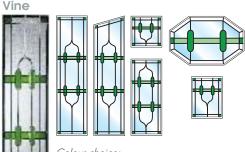

Colour choice: No colour, Amber & Blue, Green & Red (as shown) Note: when blue and amber is ordered all areas shown green come blue. All red areas become amber.

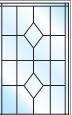

No colour, Amber bud & Blue leaves, Green leaves & Red bud (as shown) Note: when blue and amber is ordered all areas shown green become blue. All red areas become amber.

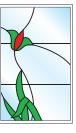

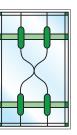

Colour choice: No Colour, Light Blue & Dark Blue, Light Green & Dark Green (as shown). Note: when Light Blue and Dark Blue is ordered, all areas shown dark

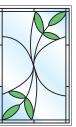

green become dark blue. All light green areas become light blue.

Time honoured stained glass manufacturing techniques are used to create our signature range of traditional glasses. Hand lead is used to join together individual panes of coloured and textured glass. This handmade pane is then 'sandwiched' within a double glazed unit creating, in effect, triple glazing. The result is quite stunning with the depth, colour and texture of the traditional glasses providing a unique visual aesthetic.

WINDOW IRO NMONGERY & *fittings* SASH

he Timber Windows range of sash windows is amongst the most comprehensive available in the UK and enables sensitive replacement of sash windows in a wide variety of applications.

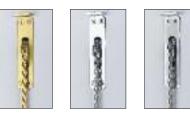

BOX SASH SIZE

Our Sash Box is available in two depths - standard at 176mm and slim sash at 142mm. The Slim Sash, at 142mm is the slimmest traditional sash window available in the UK allowing the window to finish flush with the original plaster lines without projecting into the room in most instances. The Slim Sash carries narrower double glazed units maintaining the same level of insulation by using high performance Krypton gas between the glasses. Samples of both our standard and slim sashes are available to view in most Timber Windows showrooms.

WEIGHTS & CHAINS

Our most popular sash window is hung on smooth running chains which is available in brass, chrome or stainless steel. Our chains not only provide a very pleasing gliding action in use but also make for an interesting design feature.

WEIGHTS & CORDS

For the purist we also offer the option of hanging our sash on traditional sash cords, which are pre-stretched to accommodate the weight of double glazed units.

SASH HORNS

Decorative sash horns may optionally be fitted to the bottom of the top sash externally and/or the top of the lower sash internally.

SPRING SYSTEM

Sash windows may also be hung on spring balances. This is particularly useful in more modern buildings which do not have sufficient rebate to accommodate a full sash box.

BOX SASH FINISHING KIT - STANDARD RANGE

A box sash finishing kit, which allows for colour matched architraves and window boards to be re-instated internally after installation is available.

THE HIGHEST SECURITY LOCKING CYLINDERS AVAILABLE

For the highest level of security and protection, our doors can come equipped with KABA locking cylinders. These Kitemarked, 3 star locking cylinders possess the highest level of security available, having undergone rigorous testing to provide counter measures to all common forms of potential attack on an entrance door.

The cylinders feature several layers of protection to prevent drilling, picking, bumping and extraction. In particular, it also carries a sacrificial break slot, which, in the event of the cylinder being snapped, the secure core of the lock is retained within the door, inhibiting forced override of the cylinder.

ANVIL ESCUTCHEONS Polished Chrome, Aged Brass, Polished Nickel, Black, Pewter, Aged Bronze

Additionally, these, KABA cylinders have further innovative features, including patent protected keys blanks preventing illegal copying. The cylinders also include a failsafe clutch mechanism allowing the lock to still be operated by the thumb turn from the inside in any event, ensuring that the occupant does not become trapped in the property, if, for example the lock has suffered an attack from the outside.

KABA locking cylinders are required for PAS24 compliance.

CONSERVATION DOOR styles

Wonderfully ornate, beautifully styled and splendidly extravagant, our nine Conservation door designs are evocative of our rich British architectural heritage.

Intricate details, bold panelling and exaggerated lines set this range apart. Reminiscent of the Victorian and Edwardian eras, each of the doors is a perfect replacement for properties of these stylish periods when architectural design was audacious and lavish, or let their grandeur and form make a bold statement on a property of any period for the ultimate boost of kerb appeal.
